

FIAM is honored to hold its first international conference in close partnerships with two outstanding conference co-chairs: Pierre Boivin, CEO of Claridge and Chairman of Mila and William (Bill) J. Kelly CEO of CAIA Association. Pierre was a driving force behind positioning Montreal as a thriving artificial intelligence ecosystem on the global scene.

The conference spans over two days – three hours each day. Presentations are recorded and will be made available for replay on FIAM website and the websites collaborating organizations.

DAY-1 focus on the big picture; more strategic in content, highlighting the broad issues, challenges & opportunities brought by the accelerated deployment of AI globally.

DAY-2 is directed to institutional asset managers. The field of machine learning in finance is evolving constantly. As technology continues to progress and computing power increases, new use case are being identified and new applications are being developed. Presentations will therefore cover the current landscape and the challenges/pitfalls in aca
